Blended mobilities for VET learners, Panevežys (Lithuania) and Pula (Croatia)

- ✓ 5 - day mobility
- ✓ 50 students and 4 teachers
- ✓ Blended mobility was organized in Panevežio profesinio rengimo centras in Lithuania and in Tehnical school in Pula. During the 5 days, the students worked on common exercises on the 3D printer and scanner. They also meet the school facilities and students had opportunities to exchange the experience with each other and visit the most important institutions the school is cooperating with.

23/4-27-4/2018, Panevežys (Lithuania)

8/4-27-12/4/2019 Pula (Croatia)

Joint Staff Training Events - Carinthia University of Applied Sciences, Villach

- ✓ 4 -day trainings
- ✓ Main objective: to educate teachers to be in line with modern technologies and make them able to transfer their knowledge to the students
- ✓ 21 teachers participated
- ✓ The trainings were held under the leadership of expert from Carinthia University. Different methods, types and applications for 3D prints were analyzed and discussed. Several 2D and 3D drawing tools, application modeling software, and material testing software were applied.
- ✓ Content of the workshops will be part of the Handbook
